# DEVSPACE

a developers conference

16th - 18th March, 2018

ABOUT US

Vellore Institute of Technology, Vellore

VIT is rated as one of the top 10 engineering colleges in India. It has over 35,000 students and 1000+ faculty members. It is home to a diverse student body representing around 60 countries and all the Indian States. VIT is the hub of research and education. It is a place where technological advancement is promoted and supported.

Computer Society of India, VIT Student Branch

At CSI-VIT, skilled designers, developers and tech enthusiasts work together to present a variety of solutions, services and products. To push technology forward, the chapter organizes several events, workshops and hackathons every year.

In 2017, CSI-VIT organised their flagship event 'Codespace', in addition to which 'Under The Hood', 'Send Codez', 'Yuvana', 'Riddler', 'Laser Tag' and other specialised workshops attracted a total footfall of 16,000 people.

DEVSPACE

Devspace is positioned to be one of the biggest student organized developer conferences in South India. It brings tech enthusiasts, entrepreneurs, educators, research scholars and students under one roof. Devspace provides a platform for organizations and industrial experts to interact with students.

Expo

Companies are given a space to exhibit their vision, products, projects and ideas to over 1,000 attendees. Through this, Devspace gives an excellent position to organizations for influencing students so that they gain exposure from current trends.

Workshops

Workshops provide an interactive session with the speaker and the workshops exclusive crowd. This leads to a beneficial experience for everyone present and provides a large array of benefits to the development language or technique in question at the workshop.

Talks

In this portion of Devspace, professionals come and share their experiences, projects they have been working on and emerging technologies; to inspire and motivate the attendees in pursuit of a technical career or project.

Codespace

Every year, the Computer Society of India hosts their flagship event, Codespace - a national level hackathon with a central theme which attracts 250 people every year since 2015 and has cash prizes of up to Rs.60,000.

CODESPACE

As a technical chapter, CSI-VIT aims to teach and imbibe a passion for technology in its members, and in our event's participants. This ideal in mind gave birth to Codespace. Codespace is a competitive hackathon that has an over-arching central theme. Various 'tracks' are declared under the theme, to which the participating teams contribute by making applications and prototypes using current technological trends.

Every year since 2015 Codespace has grown in scale and has been a huge success. Codespace 2017 had 230+ participants all with one goal in mind-to provide solutions for the problems encountered in society and industry.

The theme for Codespace 2017 was "Digital India and Smart Cities", targeting the schemes brought in by Prime Minister Narendra Modi. The participants contributed to this track and came up with many solutions and hacks.

This year, Codespace is going to be an integral part of Devspace occupying the entirety of the final day.

GET INVOLVED!

Devspace has been envisioned to be among the biggest technical conferences organised in VIT, Vellore and the biggest organized by a student chapter in India. With a massive student base of approximately 35,000 students, an equally enthusiastic faculty group assisting us and a comparatively affordable registration fee, this event is sure to generate a great audience.

Devspace & You

You can contribute to building Devspace with us in 4 ways.

- Sponsoring us

Our sponsorship packages are flexible and we are pleased to work with you to customize a specific package that tailors to your organisation's needs. We give you the freedom to choose what works best to meet your event participation goals. All details regarding the publicity and benefits for your company are provided on the following page.

- Delivering a talk

Delivering a talk as a professional in their own field of work or as a member of the community speaking about their passion is encouraged. Each speaker will be provided anywhere between 1 to 2 hours to speak depending on their personal requirements.

- Conducting a workshop

Workshops will be an interactive session between the speaker and the participant, giving the participants the experience of learning a new language or honing a skill and giving the presenters a live feedback on their development technique or language.

- Setting up a stall

VIT stands as a hub for future programmers, developers, entrepreneurs and gamers. A stall at VIT would allow you to interact with our student base, whether for selling merchandise, for increasing your popularity or for interacting with the community for collaboration or identifying future employees.
